Interviewed 18/5/13

Placement of charger

Mounting brackets

Possible places to put it

Problem will need 1

1. Right side of bay next to air flow system

Positives

- Don't need to move anything
- Close to airflow
- Can be easily connected to airflow
- Doesn't affect "throttle to power" time
- Can be easily attached to engine

Negatives

- Very near exhaust (very hot) will need to insulate bracket
- Have to be mounted to racer on exhaust bolt

2. Left side of bay replace battery

Positives

Negatives

- Have to move battery
- Increase tire for exposed gas mixture to reach engine bad
- Had to lie up
